LOLA

DESIGN BY ALISTAIR TAIT & STEPHEN BAKER - 2025

Lola combines artistry and functionality in equal measure. Its clean, intentional lines evoke a sense of elegance and purpose, while its durable design makes it equally suited to both indoor and outdoor spaces. Whether placed poolside, in a sunroom, or within a curated interior setting, Lola is designed to be lived with, admired, and interacted with. We wanted Lola to be admired all year round, both indoors and out, so its materiality was crucial. The aluminum frame allows it to withstand the elements all year round whilst also making it structurally sound and lightweight. The removable Urecel foam cushion allows for quick drying and is upholstered in 100% solution-dyed fabric, suitable for high UV climates.

MATERIALS

- Aluminium Frame
- Outdoor Foam & Fabric
